

Certified specialist Business Intelligence (CSBI)

My certification gave me a greater insight into topics relating to my coursework, current job, and future career. I feel equipped with skills to analyze data effectively and support decision-making to promote efficiency in the future! The set up was also very straightforward - lots of practice questions to prepare for the certification exam.

Have any questions?

Name: Allison Williams

Major: Health Information Management

School: Ohio State University

Email: williams.6493@osu.edu

Tip of the month

When talking with a new graduate about a position placement or referral, the key points important to me are:

"Be RESPECTFUL and express GRATITUDE: No matter what you know or how well you think you know it, always show anyone you encounter, respect. Respond to emails or any form of communication within 24 hours even if it is to just say you will respond fully soon, and do not forget to appreciate those you interact with professionally with sincerity. Hand-written notes are one of the best personalized appreciation practices."
