

COHFMA March Newsletter Student Committee

Mission: "The Student Leadership Committee of Central Ohio Chapter of HFMA commits to develop and engage students of future healthcare financial professions, collaborate with local colleges and universities, and support the overall chapter's mission"

Certified Revenue Cycle Representative (CRCR)

This certification expanded my knowledge of the entire revenue cycle. I feel better prepared to use the information I have learned to create an improved patient experience while simultaneously driving business results. It has empowered me to speak confidently about the financial aspect of healthcare and clarified how efficient financial communication can make me a better leader in this industry. I look forward to using this material, in conjunction with my education and experience, to develop streamlined revenue cycle processes that benefit my organization and the patients that we serve.

Have any questions?

Tip of the month

When talking with a new graduate about a position placement or referral, the key points important to me are:

Understand the significance of NETWORKING:

Show interest in getting involved with a professional organization, whichever one or more that may be. The involvement WILL be mutually beneficial, if you really put forth effort.
